Kelas : A

AKTIVITAS MANDIRI 5 — CRUD Lengkap Mahasiswa

1. Buat Resource Controller: php artisan make:controller MahasiswaController --resource --model=Mahasiswa

```
PS C:\laragon\www\PWEB_CONCERTIX\concertix> php artisan make:controller EventController --resource --model=Event
```

```
INFO Controller [C:\laragon\www\PWEB_CONCERTIX\concertix\app\Http\Controllers\EventController.php] created successfully.
```

```
use App\Models\Event;
use Illuminate\Http\Request;

class EventController extends Controller
{
    /**
     * Display a listing of the resource.
     */
    public function index()
    {
        //
    }

    /**
     * Show the form for creating a new resource.
     */
    public function create()
    {
        //
    }

    /**
     * Store a newly created resource in storage.
     */
    public function store(Request $request)
```

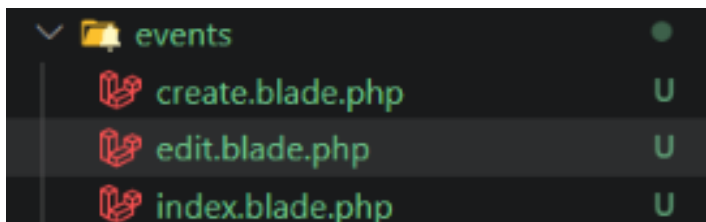

2. Daftarkan di routes/web.php: Route::resource('mahasiswa', MahasiswaController::class)

```

concertix > routes > web.php
1  <?php
2
3  use Illuminate\Support\Facades\Route;
4  use App\Http\Controllers\DashboardController;
5  use App\Http\Controllers\EventController;
6
7  Route::get('/', [DashboardController::class, 'index'])->name('dashboard');
8  Route::resource('events', EventController::class);
9  Route::get('/tentang', function () {
10     return view('tentang');
11 });
12
13 Route::get('/kontak', function () {
14     return view('kontak');
15 });
16
17 Route::get('/hitung/{a}/{b}', function ($a, $b) {
18     return $a + $b;
19 });
20
21 Route::post('/tambah', [DashboardController::class, 'store']);
22 Route::post('/update/{id}', [DashboardController::class, 'update']);
23 Route::get('/hapus/{id}', [DashboardController::class, 'delete']);
24

```

3. Buat semua view: mahasiswa/index.blade.php (tabel + pagination), create.blade.php (form), edit.blade.php (form pre-filled), show.blade.php (detail)

4. Implementasi method index() — ambil semua mahasiswa dengan paginate(10) dan tampilkan ke view

```

public function index()
{
    $events = Event::latest()->paginate(10);

    return view('events.index', compact('events'));
}

```

5. Implementasi create() dan store() — dengan validasi nim (unique), nama (min:3), email (email|unique), jurusan (in:SI,TI,MI)

```

public function create()
{
    return view('events.create');
}

/**
 * Store a newly created resource in storage.
 */
public function store(Request $request)
{
    $request->validate([
        'nama' => 'required|min:3',
        'lokasi' => 'required',
        'tanggal' => 'required|date',
        'stok' => 'required|integer',
        'harga' => 'required|integer',
        'gambar' => 'nullable|image|mimes:jpg,jpeg,png|max:2048'
    ]);
}

```

6. Implementasi edit() dan update() — tampilkan form dengan old() atau \$mahasiswa->field, validasi unique kecuali ID ini

```

public function edit(Event $event)
{
    return view('events.edit', compact('event'));
}

/**
 * Update the specified resource in storage.
 */
public function update(Request $request, Event $event)
{
    $request->validate([
        'nama' => 'required|min:3',
        'lokasi' => 'required',
        'tanggal' => 'required|date',
        'stok' => 'required|integer',
        'harga' => 'required|integer',
        'gambar' => 'nullable|image|mimes:jpg,jpeg,png|max:2048'
    ]);
}

```

7. Implementasi destroy() — dengan konfirmasi JavaScript sebelum hapus\

```

    public function destroy(Event $event)
    {
        $event->delete();

        return redirect()
            ->route('events.index')
            ->with('success', 'Event berhasil dihapus!');
    }

```

8. Tambahkan flash message di layout dan tampilkan session('success') / session('error')

```

@include('partials.navbar')

@if(session('success'))
    <div class="alert-success">
        {{ session('success') }}
    </div>
@endif

@if(session('error'))
    <div class="alert-error">
        {{ session('error') }}
    </div>
@endif

```

9. BONUS: Tambahkan fitur upload foto profil dengan validasi image|mimes:jpg,png|max:2048

```

public function uploadProfil(Request $request)
{
    $request->validate([
        'foto_profil' => 'required|image|mimes:jpg,png|max:2048'
    ]);

    $file = $request->file('foto_profil');
    $namaFile = time() . '.' . $file->getClientOriginalExtension();

    $file->move(public_path('images/profil'), $namaFile);

    session(['foto_profil' => $namaFile]);

    return redirect()->back()->with('success', 'Foto profil berhasil diupload!');
}

```

Profil Penyelenggara

Nama Penyelenggara
Concertix Organizer

Email
organizer@concertix.com

Status
Aktif sebagai penyelenggara event

No file chosen

AKTIVITAS MANDIRI 6 — Middleware & Autentikasi

1. Instal Laravel Breeze: `composer require laravel/breeze --dev`, kemudian php artisan breeze:install blade

```
PS C:\laragon\www\PWEB_CONCERTIX\concertix> composer require laravel/breeze --dev
./composer.json has been updated
Running composer update laravel/breeze
Loading composer repositories with package information
Updating dependencies
Lock file operations: 1 install, 0 updates, 0 removals
  - Locking laravel/breeze (v2.4.1)
Writing lock file
Installing dependencies from lock file (including require-dev)
Package operations: 1 install, 0 updates, 0 removals
  - Downloading laravel/breeze (v2.4.1)
  - Installing laravel/breeze (v2.4.1): Extracting archive
Generating optimized autoload files
> Illuminate\Foundation\ComposerScripts::postAutoloadDump
> @php artisan package:discover --ansi

 INFO  Discovering packages.

laravel/breeze ..... DONE
laravel/pail ..... DONE
laravel/tinker ..... DONE
nesbot/carbon ..... DONE
nunomaduro/collision ..... DONE

> dev
> vite

VITE v8.0.12 ready in 1170 ms

→ Local:   http://localhost:5173/
→ Network: use --host to expose
→ press h + enter to show help

LARAVEL v13.6.0 plugin v3.1.0

→ APP_URL: http://localhost
19.13.05 [vite] (client) [optimizer] bundling dependencies...
```

4. Coba register dan login di <http://127.0.0.1:8000/register>

A registration form for a Laravel application. The form is white with rounded corners and is centered on a light purple background. It contains four input fields: Name, Email, Password, and Confirm Password. The Name field is pre-filled with 'Admin Concertix'. The Email field is pre-filled with 'admin@concertix.com'. The Password and Confirm Password fields are masked with dots. Below the form, there is a link 'Already registered?' and a dark blue 'REGISTER' button.

Name

Admin Concertix

Email

admin@concertix.com

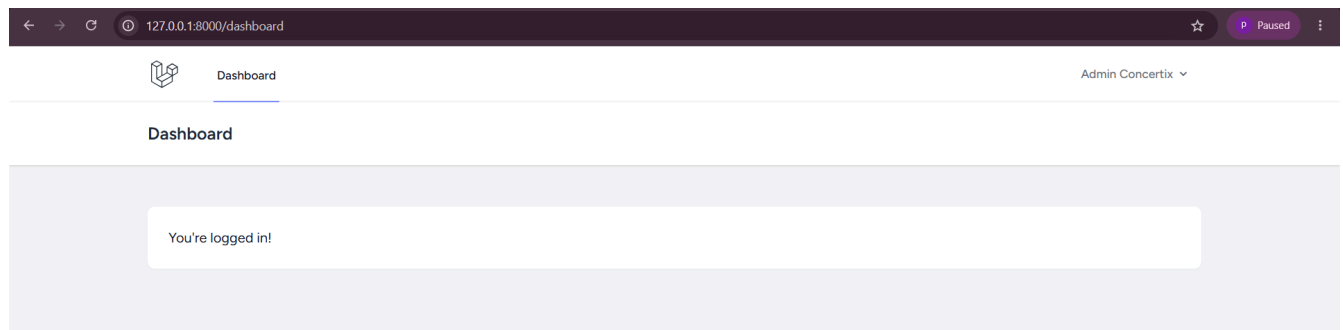

Password

.....

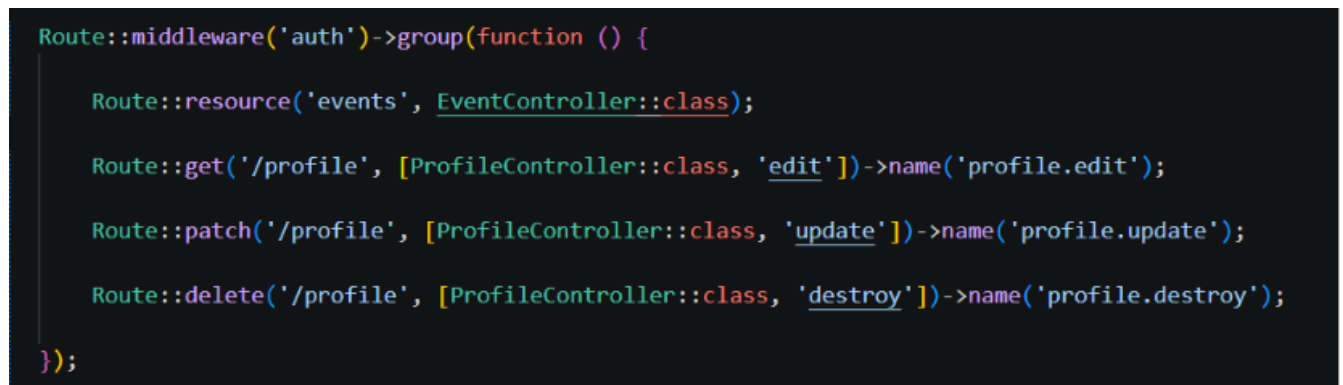

Confirm Password

.....

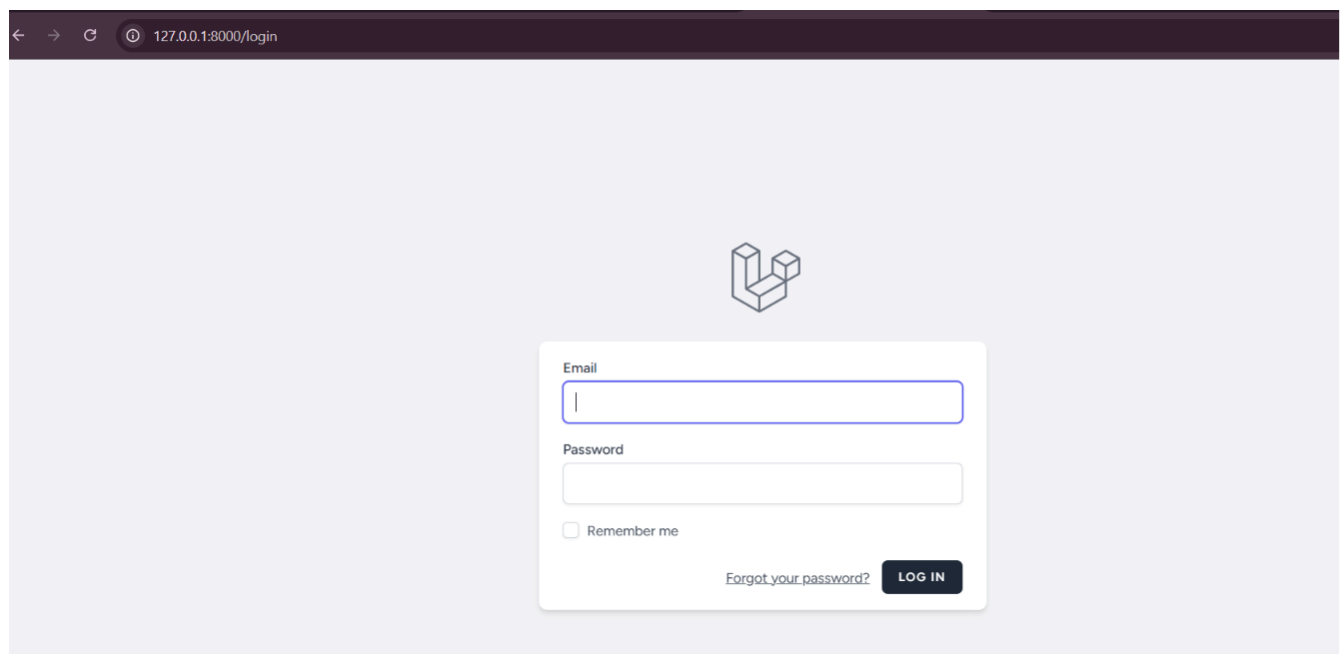

[Already registered?](#) **REGISTER**

5. Amankan semua route mahasiswa dengan middleware auth:
Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)

6. Coba akses /mahasiswa tanpa login — pastikan diredirect ke halaman login

7. Tambahkan nama user di navbar: {{ auth()->user()->name }}

```
@auth
<span class="user-name">
  {{ auth()->user()->name }}
</span>
@endauth
```

8. Buat custom middleware CekAdmin yang hanya mengizinkan user dengan role 'admin' mengakses route tertentu

```
Route::middleware(['auth', 'admin'])->group(function () {
    Route::resource('events', EventController::class);
});
```

9. BONUS: Modifikasi index() Controller agar hanya menampilkan data yang dibuat oleh user yang sedang login

```
public function index()
{
    $events = Event::where('user_id', auth()->id())
        ->latest()
        ->paginate(10);

    return view('events.index', compact('events'));
}
```
